Professional Summary

Frontend Developer with 3+ years of hands-on experience building responsive, production-grade web applications using React.js, Next.js, Vue.js, TypeScript, and Tailwind CSS. Experienced in developing scalable interfaces, implementing state management and design systems, and integrating payment platforms and AI APIs. I have a strong understanding of modern frontend architecture with additional full-stack experience building backend features using Node.js, Express, JWT authentication, and Socket.io with a proven ability to collaborate in agile teams and deliver clean, maintainable, accessible, and high-performance applications.

Work Experience

Frontend and Backend Engineer

June 2026 – Present

Wadpool | Contract, Lagos, Nigeria (wadpool.com)

- Migrated the platform's core authentication from Google OAuth and magic links to WorkOS SSO, implementing frontend authentication flows and backend integration with Supabase; resolved a duplicate-account bug in the invite flow through a profile-merge fix.
- Built and integrated 5 Twilio SMS notification workflows for payment reminders, approvals, cycle payouts, and invitations, connecting application logic to Supabase/Postgres transactional data.
- Expanded the platform for the Nigerian market by implementing NGN currency handling and country-aware bank-detail fields across the application, while integrating Slack webhooks for feedback and waitlist notifications.
- Joined an existing production codebase and delivered full-stack features across the frontend and backend, working within an established architecture and shipping multiple product improvements within 4 weeks.

Front-End Developer

January 2026 – May 2026

UDI Foundry | Typography Foundry (contract) - udifoundry.com/fonts/touki-grotesk

- Built an interactive font preview and customization system using React.js, Next.js, and Tailwind CSS, enabling users to test typography in real time across different weights, sizes, and letter-spacing configurations.
- Developed and launched a responsive typography showcase website for the Touki Grotesk font family, with dynamic controls and smooth animations optimized for desktop, tablet, and mobile.
- Implemented reusable typography controls and responsive UI patterns to deliver a polished, interactive font exploration experience across screen sizes.

Front-End Developer

January 2024 – November 2025

BLK Labs | Remote

- **Magnetify.ai** | AI-Powered Lead Magnet Platform (<https://magnetify.ai/>)
 - Built the responsive landing page and user dashboard using React.js, Next.js, and Tailwind CSS.
 - Developed an interactive lead magnet builder with drag-and-drop editing and real-time preview, enabling users to create lead pages, eBooks, and mini-courses.
 - Implemented a dynamic template and brand customization system supporting configurable color schemes, typography, and styling across multiple lead magnet formats.
 - Built lead capture forms with real-time validation and an analytics dashboard for monitoring lead performance and conversion metrics.
- **Washe** | Laundry Booking Platform (<https://washae.com/>)
 - Built a mobile-first laundry booking platform using Next.js and Tailwind CSS, enabling users to schedule laundry and dry-cleaning services with real-time availability and an interactive cost calculator.
 - Developed a Rider Management System for assigning, tracking, and dispatching riders across pickup and delivery workflows, reducing manual coordination.

- Integrated Firebase Authentication and Google Maps API for secure user access and location-based booking, improving the booking experience and reducing friction by 60%.

Front-End Developer Intern

Build Carea, Lagos, Nigeria | Remote

October 2022 – September 2023

- Designed and implemented 20+ reusable UI components across three active web projects, improving design consistency and supporting a scalable frontend architecture.
- Built accessible, responsive frontend features aligned with WCAG standards, ensuring consistent experiences across desktop, tablet, and mobile devices.
- Collaborated with cross-functional teams in weekly Agile sprints, achieving a 95% on-time delivery rate and reducing frontend QA feedback by 30%.
- Used Git and Trello for version control, task tracking, and collaborative code reviews, maintaining transparent and efficient development workflows.

Personal Projects

SquadMap | Real-Time Event Friend-Finding App (Full-Stack) (<https://squad-map-kappa.vercel.app/>)

- Built a real-time friend location-sharing platform using React, TypeScript, Node.js, and Socket.io, enabling users to join events with a shared 6-digit code and view participants on a live map without creating an account.
- Engineered the real-time location synchronization layer with Socket.io, handling bidirectional geolocation updates across multiple concurrent users while optimizing update frequency to reduce unnecessary battery consumption.
- Implemented session persistence on the React frontend, allowing users to maintain their event session across page refreshes without requiring authentication.
- Shipped the application as an installable PWA with live participant counts, event-duration timers, automatic event expiry and notifications, and real-time join/leave alerts.

IntelliDoc | AI-Powered Document Assistant (Full-Stack) (<https://intellidocclient.netlify.app/>)

- Built a full-stack AI document assistant using React.js, Node.js/Express, and Tailwind CSS, implementing JWT authentication and role-based access control for secure, personalized document management.
- Integrated the Grok AI API to automate document summarization and content analysis, with Prisma and Supabase powering structured data persistence.
- Deployed the frontend and backend on Netlify and Render, configuring the application for reliable production use across the client and server layers.

Technical Skills

Frontend: React.js, Next.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design

State Management: Redux, Zustand, Context API

UI Libraries: Ant Design, Mantine, Material UI, Styled Components, ShadCN

Backend (supporting / full-stack projects): Node.js, Express.js, RESTful APIs, JWT Authentication, Firebase Authentication, Role-Based Access Control

Database: MongoDB, Mongoose, PostgreSQL, Prisma, Supabase

Payments & Integrations: Pystack, Payment Webhooks, Google Maps API, AI API Integration (Grok, OpenAI)

Tools & Deployment: Git, GitHub, VS Code, Postman, Figma, Netlify, Vercel, Render, Firebase, CI/CD

Other: Technical Writing, SEO Optimization, Web Accessibility (WCAG), Agile/Scrum, Jira, Trello, Notion

Education

Bachelor's of Computer Science - University of Uyo, Akwa Ibom State, Nigeria | May 2023
